

NEBRASKA CHILDREN AND FAMILIES FOUNDATION COMMUNITIES FOR KIDS INITIATIVE

The Communities for Kids initiative was created in response to community requests for assistance with shortages of high-quality early care and education programs — shortages that both impact children's optimal development and pose a challenge for communities hoping to attract and retain the viable workforces they need to thrive.

Communities for Kids partners with communities' public and private entities to support and coordinate planning for access to high-quality early care and education for all children birth through age eight. These partnerships are customized to address each community's unique assets and needs — so each community can grow and prosper well into the future.

Nebraska Children and Families Foundation provides expertise and coordination to support communities using a collective impact approach:

- ENGAGE stakeholders in identifying the strengths and gaps of the current
 whole-child, early care and education resources in their community by
 completing the Early Childhood Quality and Capacity Survey (ECQCS),
 if a similar assessment has not already been completed. Engaging schools
 is an important element of this work.
- UTILIZE informed decision-making to determine strategies and desired outcomes most relevant to meeting the priority needs identified in the community assessment and detailing a business plan when indicated.
 Whenever possible, this will be done through existing planning efforts to maximize community resources.
- CONNECT communities with resources, including other communities through
 peer learning networks regarding research, best practices, implementation,
 quality measurements, financing, use of government/public resources/funding,
 and physical environmental designs, etc.
